

- Experienced software engineer with nearly two years of hands-on experience in Front End Software Development
- Versatile background spanning the enterprise learning solutions and interior design industries
- Proven expertise in creating beautiful, user-friendly UIs using React
- Demonstrated success in software maintenance and optimizing application responsiveness.
- Adept at thriving in remote work settings, with a successful track record of delivering results on international projects, including UK-based assignments

Work Experience and Projects

Frontend DeveloperPaexskin Solutions Pvt LtdMay 2022 – January 2023
Pune, India

- Managed software maintenance of the entire product codebase utilizing TypeScript/Angular, resulting in a 25% decrease in client reported bug complaints
- Improved software responsiveness, leading to a 90% reduction in client complaints
- Independently spearheaded the development and integration of a Chat-Bot prototype from scratch into the product, resulting in streamlined support and improved database retrievals for both support and development teams. Leveraged advanced technologies such as Python, Flask, HTML, CSS, and JavaScript. This initiative is projected to reduce the support team's workload by at least 25%.
- Collaborated with the UI/UX team to develop custom Moodle plugins and themes, including a training matrix, utilizing HTML, CSS, and PHP. Enhanced client functionality and efficiency by over 20%

Web DeveloperFabiia LtdAugust 2023 – February 2024
London, United Kingdom

- Increased website traffic from 2-3 to 12-18 visits per day by implementing SEO strategies
- Enhanced website performance and accessibility through writing custom CSS, JavaScript, and PHP implementations, resulting in a 100% accessibility, Best Practices and SEO scores, thus improving overall website score
- Executed web page creation using Elementor, ensuring responsiveness and optimal user experience
- Proficient in web scraping with Octoparse, resulting in significant time savings during data collection
- Optimized CSS/JS files, removing render-blocking resources, used tools to achieve website scores above 90
- Successfully resolved Core Web Vitals issues including LCP, FCP, TTFP and CLS

Reactjs DeveloperReactJs Game Hub ↗November 2024 – December 2024
Personal Project

- App to discover and browse the latest collections of games, built with rawg Api from rawg.io
- Built a responsive interface with Chakra UI, supporting both dark and light modes for a customizable experience
- Implemented search, genre filtering, platform selection, and sorting to enhance the app
- Utilized TypeScript for type safety, Axios for data fetching, and integrated react-icons for a visually appealing UI
- Created custom hooks for efficient API response handling and parameterized requests for flexible, scalable solutions

Javascript DeveloperFilm Hive ↗September 2024 – September 2024
Personal Project

- Responsive movie app using HTML, CSS, and JS, integrated with the TMDB API
- Enabled advanced functionality such as bookmarking movies, creating a persistent watchlist using local storage, ensuring data retention even after page reloads or system restarts without the need for a backend database.
- Utilized async/await to handle multiple API endpoints efficiently

Android DeveloperOne Stop Quick Shop (personal project)January 2021 – April 2021

- Led a project team to design a system eliminating cashiers and manual checkouts, resulting in an 70% reduction in average waiting time
- Engineered client and store-side applications allowing instant product scanning and purchases, significantly reducing customer checkout time and streamlining store employees’ product database entry process
- Store-side application empowered employees to efficiently add product details into the database using their smartphones, eliminating the reliance on specialized bar code scanners

Education and Certifications

- **BE IT**, Shree Rayeshwar Institute of Engineering and Technology, India. **Aug 2017 – Aug 2021**
- **ReactJS18** – React 18 By Mosh Hamedani **Sep 2024 – Nov 2024**
- **Advanced Js** – The Complete Javascript Course **Jun 2024 – Aug 2024**

Technologies

- Development: JavaScript, TypeScript, ReactJS, HTML, CSS, JQuery
- Technologies: Git, WordPress, Adobe Photoshop, Elementor, Octoparse
- Other: SEO, Web Optimization, Web Scraping, Web Design
